WIND POWER

PASSION TO PERFORM

ADVANCED FILTRATION AND CONTAMINATION MONITORING SOLUTIONS FOR THE WIND POWER

We offer comprehensive support to our customers in the development of hydraulic system for wind turbines, from conception to implementation.

Our products installed on wind turbines protect the internal components of the turbine, ensuring efficient and safe operation.

Our products will guarantee you:

Technology and experience are in the company's DNA!

THE MAIN FEATURES THAT DISTINGUISH OUR PRODUCTS ARE:

- Full control over every element of production from design to delivery
- Maintenance and Reliability
- The latest in Research and Development technology
- lnnovative design
- Noise and weight
- Integration with the turbine control system

GUARANTEED PERFORMANCE

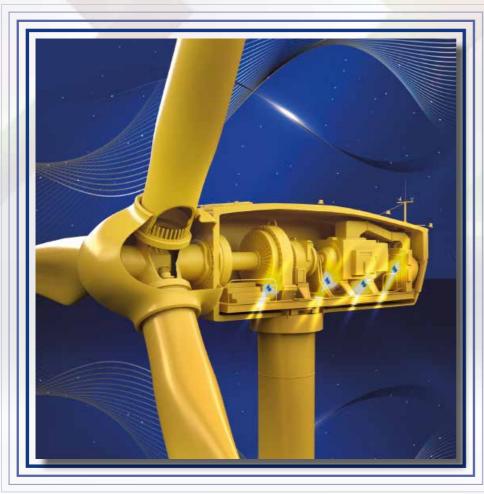

MULTI-PASS ISO 16889

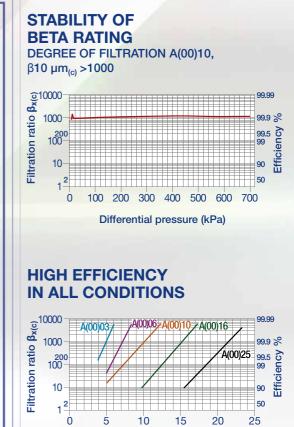

The ISO Multipass test evaluates the characteristics (or performance) of a filter element, providing data on efficiency and capacity.

ISO standard filt	tration compared
β _{x(c)} > 1000 ISO 16889	Filter media code
ISO 16889	MP Filtri
5 μm _(c)	A(00)03
7 μm _(c)	A(00)06
10 μm _(c)	A(00)10
16 μm _(c)	A(00)16
21 μm _(c)	A(00)25

$$\label{eq:constream} \begin{split} \frac{\text{Upstream}}{\text{particles number > X } \mu m_{(c)}} \\ \frac{\text{Downstream}}{\text{particles number > X } \mu m_{(c)}} = \beta_{x(c)} \end{split}$$

Designed to thrive in even the most challenging working conditions

Particle size µm(c)

HYDRAULIC FILTRATION

Designing an effective filtration system requires a precise evaluation of its specific features, including: sensitivity of the individual components, the degree and type of contamination, circuit pressure,

flow rate, environmental conditions, fluid used and intervention cycles, delivering longer machinery lifespans and reduced service costs.

RETURN FILTERS

FILTER ELEMENTS

DUAL STAGE - FILTER ELEMENTS OPTIMISED FOR USE IN THE VARIOUS CONTROL AND LUBRICATION SYSTEMS OF WIND TURBINES

Thanks to the DUAL stages, downstream coarse filtration keeps oil clean, even with an open bypass valve.

Plus:

- High resistance to harsh conditions
- High viscosity
- Low temperatures
- Capture contamination
- Moisture control

WIDE RANGE OF ELEMENT OPTIONS FOR MYCLEAN AND ZEROSPARK® CONCEPT FILTERS

Wide range of filter elements in various filtration grades for all MP Filtri filters and as interchangeable.

THE CONCEPT FOR OUR FILTERS

Zerospark+ THE ANTI-STATIC FILTERS THE ANTISTATIC Z CONCEPT FOR OUR FILTERS

TANK ACCESSORIES

The complete range of tank accessories for hydraulic circuits comprises breather filters, filler and breather filters, filler caps, visual and electrical level indicators, pressure gauges selectors, flanges for fixing the oil tubes on the tank cover and inspection covers.

Filler and breather filters have a dual function at the tank inlet filtering incoming air and pre-filtering the fluid through the basket. This prevents the entry of foreign bodies during the filling or refilling operations.

of the oil level in the tank

POWER TRANSMISSION

Drive couplings provide the means by which power is transmitted from the electric motor to the hydraulic pump.

The e-PTO coupling is specifically for electrically powered power take-offs

BELL-HOUSINGS

Bell-Housings are used as connecting elements between IEC electric motors and a wide range of hydraulic pumps available on the international market

CONTAMINATION CONTROL SOLUTIONS

MP Filtri designs and manufactures a complete range of contamination control solutions aimed at increasing the life and the productivity of the hydraulic circuits. The technology developed by our Contamination Monitoring Products division allows preventive and predictive maintenance, guaranteeing

maximum continuity of operation, a longer life cycle of the components and a relative reduction in costs. A complete solution that combines highly functional and energy-efficient systems with a wide range of after-sales services.
